Billet Exhaust
Regulators

Alamo Industries Ltd. has been manufacturing regulators for over a decade. We have an extensive in-house quality control program for every step of the manufacturing and assembly process.

All of our regulator bases are machined from top quality exhaust grade bar stock and have a multiple bolt pattern to fit a wide variety of applications. It is worth noting that none of Alamo's regulator parts use a sand casting process, **BILLET ONLY**. The added aluminum ribs assist in dissipation of heat.

Our regulators are a direct OEM replacement.

Alamo Industries Ltd. stocks an extensive array of regulators and parts.

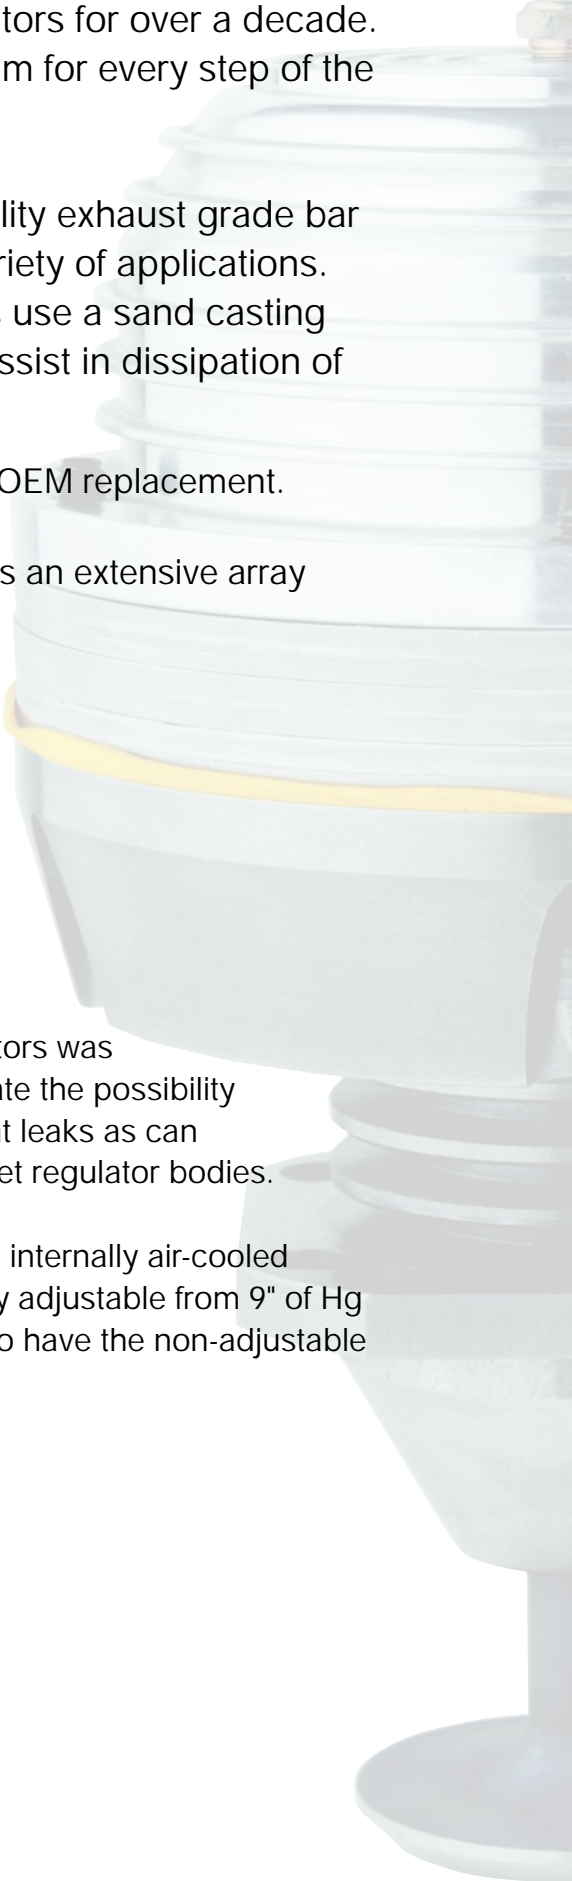

AIL-99 A

AIL "A" Series

This series of regulators was developed to eliminate the possibility of dangerous coolant leaks as can happen with non-billet regulator bodies.

These regulators are internally air-cooled and the AIL-99 is fully adjustable from 9" of Hg to 72" of Hg. We also have the non-adjustable AIL-95.

AIL-95 A

AIL-95 W

AIL-99 W

AIL "W" Series

Alamo Industries Ltd. recognizes a need in certain industries for a water-cooled base regulator. We offer the water-cooled application on both the fully adjustable AIL-99 and the non-adjustable AIL-95 regulators.
